

REUSABLE CLIENT DOCUMENT SYSTEM

DeepStone Design Language

深石科技通用设计标准

One calibrated system for HTML, Word, PowerPoint and PDF.

Built for natural-language generation and repeatable client delivery.

FIGMA-CALIBRATED

EXACT FONTS

NATIVE OUTPUTS

01 · FOUNDATION

A restrained, editorial system

Use hierarchy, whitespace and evidence—not decoration—to create confidence.

01

Typography

English · EB Garamond
· Swei B2 Serif CJKtc
Medium for Chinese UI and body text

02

Composition

1440 px desktop canvas
1136 px principal content width
Editorial asymmetry and generous air

CORE PALETTE

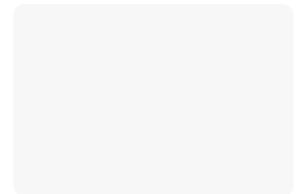

Ink
#0A0A1E

Deep navy
#141539

Link blue
#094197

Quiet
#F7F7F7

Rule of restraint

Use only the approved dark-band and editorial-text gradients; keep all other surfaces solid.

02 · NATIVE FORMAT MAPPING

One language, four native outputs

Preserve the brand logic while respecting how each file type is actually used.

01 · HTML

Responsive sections

Semantic structure, accessible controls and local font faces.

02 · WORD

Long-form narrative

A4 rhythm, styles, tables, page furniture and editable text.

03 · PPT

Executive storytelling

One message per slide, large type and presentation-safe hierarchy.

04 · PDF

Controlled distribution

Embedded fonts, selectable text and verified final rendering.

NATURAL-LANGUAGE EXAMPLE

“Create a 10-page Chinese board deck, plus a Word summary and PDF.”

The generator turns intent into a shared brief and canonical content map first.

From request to verified delivery

A repeatable workflow keeps every format aligned and every claim attributable.

01 **Interpret** Extract audience, purpose, language, formats and constraints.

02 **Structure** Create one brief and one canonical content map before layout.

03 **Generate** Build each native file with the shared tokens and official assets.

04 **Verify** Check content, typography, logo use, overflow and rendered output.

Client-ready means:

official logo variant

exact bilingual fonts

no invented facts

native, editable source

rendered QA
